# TAC Africa Launches The Kids Drone Academy To Mark Nigeria's 62nd Independence Day.

TAC Africa is Nigeria's leading Technology driven Anti Crime Non Governmental Organisation, and currently a fast-acting remedy to recommending solutions to Nigeria's Insecurity challenges by leveraging on new smart technologies to shape the future of Africa's Security Architecture and Network. It desires to maintain a front line in sharing Innovative solutions and experiences through technological possibilities and other relevant mechanism of legal advocacy, research and talent development in curbing Crime beyond any human imagination.

It was indeed a remarkable day Saturday 1st October 2022 at the Tac Community Hub Facility (Centre For Excellence), which is mostly described as the birth place of Technology in Africa. For many individuals this venue is best described as heaven on earth with it's amazing facilities that inspires and endears a strong life wire to knowledge acquisition through research and relaxation with it's unique aesthetic impression from any view.

The Chief Executive Officer/Founder in Nigeria of Technology Against Crime In Africa (TAC Africa) Dr.Jerry Akubo a very articulate Security expert and Consultant delivered the Keynote lecture, which was themed “Innovative approach towards ensuring Sustainable Safety In Nigeria’s Democracy: the future for kids in Technology.”

In his opening speech, the CEO of TAC Africa, Dr. Jerry Akubo dedicated the Independence Day Celebration to the kids by Inaugurating The Kids Drone Academy for the future leaders of tomorrow. He further expressed his unbridled Patriotic commitment towards Nation Building through Child Development and Innovative Impact leveraging on Technology.

Furthermore, the CEO further reiterated his commitment through his Independence Day Speech, that the launch of the Kids Drone Academy is a prerequisite step to advancing Child Techchnological Career path/interest and developing the Africa's Economic and Security space through Research, Digital Specialized Skills and Capacity building for Academia, Law Enforcement Agencies, Government Organizations and individuals by serving as catalyst through which Emerging Technological Solutions could be thought in a structured and easy to learn methodology.

Interestingly, the event was indeed colourful with an array of Technological exhibition with various models of Latest and Sophisticated Drone Cameras to signify the first Inaugural lecture and class of the Kids Drone Academy.

Head of Exhibition Team TACA Africa, gave a robust exposition of the various Drone models and it's dynamic operations remotely when used for any relevant purposes for which the Drone serves ranging from Security, Surveillance, Geographic, E-mapping, Research, etc.

The Kids were no doubt excited and overwhelmed by the scene of Drone Cameras as they were allowed to touch, and understand the physical components of the Drones.

“

I'm very happy to see a Drone for the first time in my life, It inspires me to research and study further about it's amazing features.

*Member of the Kids Drone Academy*

Another kid by name Somto expressed, "today is a remarkable day in my life on Nigeria's Independence Day, am privileged to see a Drone, makes my entire life memorable.

In his closing Remarks, the CEO TAC Africa announced the news of a 5 Man Team to be trained on Drone Manufacturing/Maintenance in Canada which is a huge achievement to it's objectives, and therefore urged the Kids to always use their head and be morally upright at all times, as they are the leaders of tomorrow. He admonished members of the Kids Drone Academy to take their studies seriously and count it a great privilege and opportunity to be part of today's Inaugural Drone Academy to mark our great Nation's history of 62nd Independence Day Celebrations.

The event came to a close with a specular event at the Tennis Clinic Hub, where the Kids were allowed to get trained and play Lawn Tennis with a Professional Coach.

This no doubt made the event very interesting for the kids as their mental development was a fundamental concern to the Founder/CEO TAC Africa, as this process will undoubtedly harness their potentials and talents in Sports activities.

The Kids had so much to eat drink, as they were very excited and happy to participate in the launching of the Kids Drone Academy on the Independence Day.
